

## **Racial Disparities in the Assessment of Instrumental Activities of Daily Living Research Opportunity**

*If you are experiencing memory problems or care for someone with memory problems you may be eligible to participate in this **Racial Disparities Research Study**.*

The purpose of the study is to examine disparities in the performance of instrumental activities of daily living such as shopping and cooking, between African Americans and Caucasians with Mild Cognitive Impairment and to identify mediators of these disparities.

**Racial Disparities Research** Visits will take about 2 hours & will include:

- Paper & pencil test of memory & Instrumental activities.
- Interviews with your “Study Partner”.
- Interviews with you.
- Past and current medical history.

**Racial Disparities Research** Enrollment is open to:

- Caucasians & African Americans.
- Age 65 and over with mild cognitive impairment.

**Racial Disparities Research** Participants will receive \$50 for participating in this research study. The information gathered from the study will assist in the development of more accurate Instrumental Activities of Daily Living (IADL) measures in order to detect cognitive impairments.

**IF YOU ARE INTERESTED IN PARTICIPATING CALL 404-728-6544. Study Coordinator: Lavezza Zanders.**
